Ball segment valve

Si-105 EN

Edition: 2016-04

Type KVT/KVX

Nominal pressure

Nominal size

Material

Wafer design

PN 100

DN 25/5 - 150

Stainless steel

- **Control- and shut-off valve**
- **High capacity**
- **Ball segment and shaft made in one piece, gives a torque transmission free of backlash**
- **Excellent tightness irrespective of differential pressure**

The SOMAS ball segment valve type KVT with a centrally mounted ball segment and KVX with an eccentrically mounted ball segment are of wafer design.

The valve body is made in one piece for sizes DN 25/5 up to DN 50, while DN 80 up to DN 150 has a split body design. Ball segment and shaft are made in one piece.

The spring-loaded seat offers excellent tightness also at low differential pressure.

The valves can be used for control, as well as for shut-off applications, of practically every type of media within a wide temperature range. Choose KVT for liquids, media containing impurities, sludge and chemicals. For dry media such as steam, gases and acids, choose KVX. In the KVX-valve the ball segment is eccentrically mounted and rotates out from the seat when the valve is opened. This reduce the wear on seat and segment.

The SOMAS valves are delivered ready for installation and operation. The valve assemblies are delivered factory tested as complete units with actuators, positioners and accessories.

Tightness class

The tightness class is related to the chosen material in the seat ring.

PEEK	Code S	EN 60534-4 VI (ASME B16-104 Class VI)
HiCo seat	Code T	EN 60534-4 IV alt. V (ASME B16-104 Class V)

Flow characteristics

100% Flow

Pressure and temperature rating

According to the material in the seat.

Seat Code	Max. working pressure ¹ (bar at ° C)				
	150°	170°	200°	280°	>280°
S	80	65	30	–	–
T	80	75	70	65	Note 1

10 bar = 1 MPa

Note 1: Check with SOMAS

¹ **NB!** Do not exceed working pressure for the valve.

Flange standard

SOMAS ball segment valves type KVT and KVX in above mentioned sizes are flangeless and shall be clamped between flanges.

The valves can be drilled according to ASME.

When ordering, please state required drilling.

Torque

Valve DN	Shaft dia. (mm)	Necessary closing torque	
		Min. (Nm)	Max. (Nm)
25/2 - 25	20	60	200
40	20	100	200
50	20	130	200
80	25	250	370
100	30	370	640
150	40	850	1500

Capacity factor Kv and Resistance factor ζ for ball segment valve type KVT, PN 100

DN	Opening angle										ζ 90°
	10°	20°	30°	40°	50°	60°	70°	80°	90°		
25/5	0,07	0,16	0,28	0,4	0,5	0,59	0,66	0,72	0,75	–	
25/10	0,2	0,7	1,15	1,55	2,1	2,5	2,85	3,15	3,3	–	
25/15	0,6	1,5	2,6	3,8	5	6,2	7,2	8,8	12	–	
25/20	1,1	2,7	4,7	7,1	9,5	12,3	15	18,1	20	–

Valve sizing

Use SOMAS valve sizing program SOMSIZE to find the correct valve size. All sizing factors are included in the program.

Actuators and accessories

The valves can be fitted with SOMAS manual, on/off or control actuators in accordance with the selection table. The valves will then be delivered as tested units ready for installation.

In the documents library on www.somas.se there is also information about positioners, limit switches and solenoid valves.

We can also fit other types of actuators and accessories in accordance with your specification.

Ordering

State desired valve according to the valve specification system below as well as type of actuator, positioner and accessories.

Further technical information

Technical data for the materials used in the SOMAS valves, flange standard, steam data, etc. can be found in documents library on www.somas.se.
